

CAN YOU IMAGINE? GROWING DREAMS

A giant oak tree starts out as a **tiny acorn**. After it's planted in the ground, the acorn needs rain, sunlight and oxygen to grow **big and strong!**

Like an acorn, any goal or dream that you can **imagine** starts as a small seed of an idea. With a little help, these seeds become **BIG IDEAS**, just like an oak tree.

WHAT DOES YOUR SEED OF AN IDEA NEED TO HELP IT GROW?

Draw or write what your idea needs here.

TO FOLD:

With this side down, fold along dotted lines until the two halves of the acorn come together. Smooth down the folds so the flaps open to reveal the oak tree.
